**National Institute of Standards and Technology**  
Technology Administration, U.S. Department of Commerce

## C O N T E N T S

Introduction to ITL	1
ITL Technical Divisions	2
ITL Projects, Products, and Resources	10

### ABOUT THE NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

**A**n agency of the U.S. Department of Commerce's Technology Administration, NIST strengthens the U.S. economy and improves the quality of life by working with industry to develop and apply technology, measurements, and standards. It carries out this mission through four interwoven programs:

- the NIST Laboratories
- the Advanced Technology Program
- the Manufacturing Extension Partnership
- the Baldrige National Quality Program

*For more information about NIST,  
see <http://www.nist.gov>.*

January 2001

U.S. DEPARTMENT OF COMMERCE  
Donald L. Evans, Secretary

Technology Administration  
Karen H. Brown, Acting Under Secretary  
of Commerce for Technology

National Institute of  
Standards and Technology  
Karen H. Brown, Acting Director

**W**e welcome you, our customers and clients, to the Information Technology Laboratory (ITL) of the National Institute of Standards and Technology (NIST) of the Commerce Department's Technology Administration. ITL's mission is to strengthen the U.S. economy and improve the quality of life by developing and applying technology, measurements, and standards for information technology (IT). Working in partnership with industry, academia, government, and consortia, we develop tests and test methods, quality assurance techniques, tools, models, reference data, and proof-of-concept implementations for emerging and forward-looking information technologies.

**ITL's** current research and development projects within eight technical divisions are listed in this brochure. Each project is linked to a relevant Web page or technical contact. An alphabetical cross-reference of ITL projects, products, and resources follows the division listings. We offer many opportunities for collaboration with industry organizations in these and other areas of mutual interest. Our management team is available for consultation on IT issues, solutions, and research directions.

**T**o learn more about the challenging and exciting work of our laboratory, we invite you to view our Web site at <http://www.itl.nist.gov>. In partnership with industry, ITL will continue to produce the tools and metrics needed by U.S. industry in the new millennium to develop high-quality IT products and services for the global marketplace. We look forward to hearing from you, our customers, and sharing our resources and experience.

William O. Mehuron, Director  
 Susan F. Zevin, Deputy Director  
 Information Technology Laboratory

INFORMATION TECHNOLOGY LABORATORY

ITL

**T**he Convergent Information Systems Division facilitates high-impact industry cooperation through research and development into state-of-the-art convergent information systems via advanced systems and application integration by: 1) creating and prototyping systems for the display, storage, and access of all forms of digital content; 2) serving as a neutral testbed for measurements and standards that provide verifications of functionality for multimedia technologies, and gaining experience in the deployment of these technologies and developing metrics for these representative technologies; 3) evaluating advanced hardware and software components, new architectures, novel application technologies, and innovative measurement and test methods. Victor R. McCrary, Chief, (301) 975-4321, [victor.mccrary@nist.gov](mailto:victor.mccrary@nist.gov)
